

8/26/85 Monday

Bone discovered 6th & 7th well pts N of Southern Edge on West side
 (Count given as 7th & 8th wellpoint N of SW corner of header)

Well pt. 13th first sign Heliosoma
 (SW corner)

Bone found in Pest Plug (red-brown pest) blown 'up' in casing.

Crew: DF, TP, JR, BB, GK, DD
 GHD, TS, Mike Keeler

Volunteers: Greg Jones, Vernon Coombes
 Pam, scator

Progress: 14 well points sunk along wedge of pond starting at the SW corner. For total of 28.
 Ran out of coarse sand N 1:30 PM, did minor readjustment of header + joining sleeves (rubbers), few loose bands tightened, afternoon post 2^{pm} not productive as sand delivery late.
