* Assigned BL. 145 to cranium in pelvis area of 129. BL. 129 cranium is crushed and to the west of post cranial skeleton. Traces of Adipocere in rib area. Sloped stakes in association with burial. DZ.
Both 129 & 145 is S $\frac{1}{2}$ of unit.

- Stake in W $\frac{1}{2}$ west center has unassigned bone area - very poorly preserved.

1-14-87

* BL. 145 is underneath BL. 129, ^{level} - 18-20

* BL. 146 Assigned to bone in west center of 429
very poor condition. level 19±

* BL. 147 assigned to burial just south of BL. 143.
in center of East edge of lot 430

* Found additional cranium just South of BL. 143
cranium and just North of BL. 147.

* LOT 140 N148 E69 spec # 1-36
→ pulled yesterday - specimen sheet in TODAY!
TC, JC,

BL. 148 Assigned to infant in vicinity of BL. 140-
NE 1/4 of 431 At level 25±

* Conche shell into west wall column near skull of BL.
138

BL. 149 Assigned to baby bone just NW of BL. 142, originally thought
to be BL. 142 skull - BL. 142 has NO skull at

* Penn State Column # 17 this point

↓ Spokean in LOT 427 East wall

1-14-87

IN LOT 430

BL. 147 extending westward - on hold for present. south and below 147 is skull under block of 147. South of skull is thick area of grass mat with adult mandible / may or may not be associated with skull.

Going to work North of 147 to see what's happening with another unassigned skull just south and adjacent to BL-143 skull. Ba

B.L. 129 - ss # 508 N154 E69 sent to Beta for C-14 date - wooden stake north of cranium. PIN 57 PTE 60 elevation 181-217.

200-217 segment for C-14

Orientations

BL. 129 center pelvis along vert to cranium 274°

BL. 142 center pelvis along vert to where cranium should be is 242°

BL. 141 center of pelvis along vert to base of skull is 276

LOT 431 North center of unit. just NW of ved skull are deer metapodial & other possibly worked faunal bone - letter-opener-like.

BL. 138-139 continues westward from westward notch - will remove skull & skull

1-14-87

BL. 146 appears to be a very tightly flexed - bone in incredibly bad-shape. Found one fish bone around pelvis - will take special sample of area around pelvis.

X BL. 150 Assigned to bone concentration in south center of unit - - Red skull may belong to this! JC. delineating extent - cloth found inside left unisominate
Special sample 514, 513 55 of stomach area

BL. 138 cranium into west wall of LOT 431 - female Adult about 25 yrs old. with large buccium (concho shell).

Yellow tags For 1-14-87

BL. 128.27 Frags (sent in on 1-13-87)

130.31 Frags

134.10 Cranium S.A.

121.44 Frags

128.27 Frags
